

# Green screening

*Suitable for students aged 7-11.*

Students can use a simple app such as *Green Screen* to transport themselves back in time to a revolutionary event. Students film themselves in front of a green screen (a piece of plain fabric works well) and then import an image from our collection [ageofrevolution.org/200-objects/](http://ageofrevolution.org/200-objects/) to make it look as though they are really there.

They could stand next to Locomotion I [ageofrevolution.org/200-object/locomotion-no-1/](http://ageofrevolution.org/200-object/locomotion-no-1/) and report on this 'revolutionary new mode of transport' or in front of the Launch of the SS *Great Britain* [ageofrevolution.org/200-object/launch-of-the-great-britain-steamship1843-lithograph-of-a-painting-by-joseph-walter/](http://ageofrevolution.org/200-object/launch-of-the-great-britain-steamship1843-lithograph-of-a-painting-by-joseph-walter/) and interview another student in role as one of the passengers or bystanders.
